

Electric Lifting Asphalt Mixer 30k

For mixing Asphalt, Foodstuffs, and Resins

This is a machine for mixing asphalt for testing.

The vessel is an oil-bath system. It is heated by a plug heater and temperature is controlled by a temperature controller.

Agitation is performed by two blades revolving on their own axis while rotating in an orbital motion. Agitation time is controlled by a digital timer.

The vessel is lifted and lowered electrically. To remove the specimen, the lowered vessel is rolled over by a handle and the specimen is scraped out with a spatula.

SPECIFICATION

Vessel : 30liters Oil-bath type

Electric motor : 3-phase 200v 1.5kW

Number of rotations :

Agitation timer : Digital timer type

Lifting and lowering of vessels : Electrically operated
(With balance weight)

Heater: 200V 3.0kW

Operating temperature : Max. 180°C(356°F)~

Temperature Controls : Digital temperature controller

Dimensions : 1420Hx740Wx840D
